- Public education training
- Independent incident review

THE UK's NATIONAL FIRE SAFETY ORGANISATION
Protecting people, property, business and the environment

Technical Expertise

The **Fire Protection Association (FPA)**, founded in 1946, is the UK's national fire safety organisation, promoting fire safety within industry, commerce and to the wider public. We provide authoritative advice and support on all aspects of fire safety and fire risk management through research, training, publications, and technical consultancies, including risk surveying and auditing.

The FPA's **Technical Division** comprises highly experienced and qualified professionals offering a comprehensive range of fire safety advisory and consulting services tailored to meet the clients' needs. We have extensive experience in all sectors including military, industry, commerce, local government, fire and rescue services, healthcare, insurance and other occupancies.

We are able to offer our complete range of high integrity, cost-effective services that will add value to your fire risk management programmes. Where the solution requires a multi-disciplinary approach, we are able to draw upon extensive consultancy experience.

All consultancy services are conducted in accordance with the requirements of the FPA quality management system, which is certified to BS EN ISO 9008.

How the FPA can help

Using the multi-disciplinary professional skills at our disposal, the FPA can work with the fire and rescue service and other public sector organisations to provide bespoke solutions focusing on efficient and effective community risk reduction and organisational development.

The FPA annually evaluates all fire and rescue services' Integrated Risk Management Plans in respect to their impact on business continuity and property protection, and therefore have unrivalled experience in this area.

The Project Consultancy team offers a range of fire and risk consultancy services to fire and other local government organisations including:

- **Fire Risk Reduction Strategy, Planning and Impact Appraisal**
- **Fire Safety Management, including Business Continuity**
- **Training Delivery**
- **Client Liaison**
- **Bespoke Consultancy**
- **Public Education Training**
- **Independent Incident Review**

Fire Risk Reduction Strategy, Planning and Impact Appraisal

The FPA's **Fire & Rescue Consultancy** team can help review existing strategies, policies and action plans with a particular focus on their effectiveness and efficiency in terms of risk reduction. We can undertake focused analysis in areas of service management and delivery that can in turn inform strategic decision-making processes. Acting as a 'critical friend', we can provide an independent external challenge.

Fire Safety Management, including Business Continuity

The FPA is able to provide support to assist in the development and review of fire safety service provision, and provide cost-effective, practical solutions for specific fire safety intervention programmes.

In the area of business continuity, we can provide both an internal and external focus, ensuring that the organisation's own plans are robust and helping to support business continuity planning advice and support to the public and private sector.

Internal Training Delivery

We recognise the importance of having well trained staff, both in terms of personal safety and service delivery. The FPA developed and now delivers a suite of modular Fire Safety NOS courses which can be tailored to suit your local requirements based on all aspects of the management and delivery of fire and rescue service community fire risk reduction.

Client Liaison

With extensive experience of working across a range of public and private sector organisations we are in a position to facilitate client liaison in support of fire safety delivery, particularly in those organisations spanning a number of fire and rescue service areas.

Bespoke Consultancy

Impartial expert opinion underpinned by evidence and research for a range of fire and risk related issues. Many programmes contain elements of work that are unique and ground-breaking. Our team of professional scientists, engineers and analysts work with clients to find solutions to challenges they face, or to develop new opportunities to improve risk reduction.

Public Education Training

Effective community risk reduction involves partnership working with the private, public and voluntary sectors. Our experts can provide bespoke life safety or public education training to fire and rescue services and other bodies to help raise staff awareness, improve engagement and support effective service delivery.

Independent Incident Review

With a combination of fire risk management, forensic investigation and fire and rescue operational experience, we can offer assistance to fire and rescue services seeking to learn from operational incidents.
